

combining cannot go below the floor: the uncorrelated part is only 21 pb

$Z \rightarrow \mu\mu$ alone

35 pb

-- correlated floor 28 pb (luminosity 23 pb + shared theory)

$Z \rightarrow \tau_h \tau_h$ alone

322 pb

combined

35 pb

total uncertainty on $\sigma(60 < m < 120)$ [pb]
